Re: Velvet Mine, M/037/040, Request for Bond Reduction

Dear Mr. Baker:

U.S. Energy Corp. has completed certain reclamation work activities at the Velvet Mine site. This reclamation work consists of filling the portal, remove surface facilities, capping and covering ventilation boreholes, removal of culverts, site grading and soil cover where soil was available. U.S. Energy Corp. requests that the Bond for the Mine Permit M/037/040 be reduced to reflect only the remaining reclamation work to be completed. The remaining reclamation work is seeding, addition of soil amendments and ripping of affected areas that amount to less than 20 acres. Should you have any questions please contact me at (307) 856-9271.

Sincerely,
U.S. Energy Corp.

Fred Craft
